

Ozone and Negative Ion Dryer

Premium Coat

- ★ Disinfects and Deodorizes
- ★ Repairs and Protects Cuticles
- ★ Reduces Shedding

Used on Top Show Dogs Around the World

See the difference when you Harness the Power of Ozone and Negative Ions

Why low concentration Ozone?

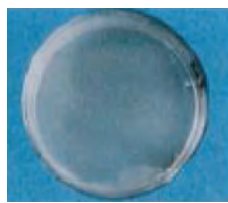

Ozone is a strong disinfectant and deodorizer, but high concentrations of ozone can be damaging. Premium Coat produces safe and beneficial low concentrations of ozone for premium effectiveness.

Why Negative Ions?

Using Negative Ions together with low concentration Ozone gives you an *amazing* ten times the disinfecting power of Ozone alone.

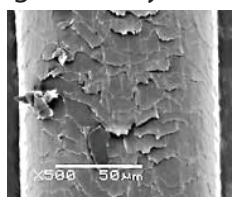

Untreated gel medium

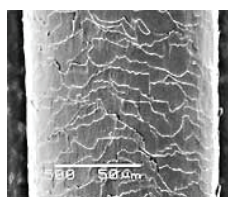

Gel medium treated with Ozone and Negative Ions

How does Premium Coat effect hair cuticles?

Cuticles are damaged by the environment, too much processing and just time. Damaged cuticles cause your dog's coat to look dull and feel harsh. Premium Coat's Ozone and Negative Ions repair the damage and restore that healthy, winning shine to your champion!

How does Premium Coat help stop shedding?

It's a well-known fact that bacteria and fungus on the skin are one cause of dandruff. Did you know that these same bacteria and fungus cause premature and excess shedding? Premium Coat delivers a double punch with the disinfecting power of Ozone and the oxidizing power of Negative Ions.

Skin condition is improved and itching and inflammation decreased. This treatment is highly recommended for dogs with dandruff and other skin conditions.

Premium Dryer has a unique Breeze setting. On this setting, the Premium dryer can be used as an air cleaner. The Ozone and Negative Ion double punch will leave your home or office clean and fresh. Keeping the environment clean will increase the effectiveness of coat treatments and your dog will have an even healthier, shinier coat.

Even dogs that have conditions that prevent you from shampooing them can benefit from Premium Dryer. Gently brush the dog while using the Breeze setting and your dog's coat will be disinfected and deodorized, helping to reduce itching.

✓✓ The effectiveness of the Premium Dryer is enhanced when you use Magic Mist. Magic Mist is available in 100cc, 300cc and 1 liter sizes.
